

## **BC Target Sports Association - 2015/16**

It has been another busy time for BCTSA as we carry on with normal activities and started instituting the new NCCP coaches training programs.

We held our Provincial Pistol and Rifle Championships in Parksville, this year as a blended competition. The Club facilities are one of the few in the Province with the size to accommodate both the Pistol and Rifle groups together, along with also hosting other events on the same weekend. It was a very busy time but I think everyone had a good time and there were some great scores shot.

We have mostly completed the process of a total remodel of our Home Page. On average we have over 70 to 100 people per day signing in to the page so it is critical that we stay current with both information and technology. This year we have turned on Face book and Twitter feeds to add to our contact abilities. Our next goal is to be able to pay on line for courses, memberships and events. We are working on mobile access and creating a separate Executive section.

We have hosted a number of Instructor Beginner coaching courses in Pistol and Rifle, to bring new coaches into the system and have done 2 camps for Aboriginal athletes and coaches to assist them in their quest for future NAIG success. The last Team did very well at the games and won the overall competition so everyone is very proud of the achievement of these young athletes.

We have trained MLF people in place for both Rifle and Pistol and also a number of LF trained people across the Province who can provide training for more coaches. Also having no level 3 course for rifle and pistol hampered us as we are in talks to get back into BC Summer games. But we made use of some experienced coaches to assist in the build up to the games while we wait for the new course levels to become functional.
