

SHOOTING FEDERATION OF CANADA

2021 – 2024 QUAD NATIONAL AND DEVELOPMENTAL TEAM

QUALIFYING SCORES

At the 2020 High Performance Committee Face to Face held in March, 2020, a decision was made to standardize the National and Developmental athlete qualifying scores for the next quadrennial. This allows the athlete to know how the High Performance Program criteria on qualifying scores will be determined for the next quad. The qualifying criteria are as follows:

YEAR	COMPETITIONS	NATIONAL	DEVELOPMENT	JUNIOR
2021	Team rolled over from 2020	50 TH percentile	75 th percentile	Junior qualifying scores will be the result of a formula designed to guide us towards performance levels at or better than the middle of an ISSF Junior World Cup field by 2024. These scores will be calculated using the same years as listed under “competitions” in this chart. They will be calculated based on the mean of the median of all ISSF Junior World Cups in or World Championships.
2022	2018 and 2019 ISSF World Cups	45 th percentile	70 th percentile	
2023	2019 and 2021 ISSF World Cups and World Championships and Olympics	43 rd percentile	68 th percentile	
2024	2021 and 2022 ISSF World Cups and World Championships and Olympics	40 th percentile	65 th percentile	

The HPC aims to empower our athletes with the knowledge of the qualifying expectation through the next quad to support their training as they endeavor to move towards podium performances at an international event (World Cup, World Championships, Olympics) outside of CAT and Panam Games.
